In mathematics, a unimodular matrix M is a square integer matrix having determinant $+1$ or -1 . Equivalently, it is an integer matrix that is invertible over the integers: there is an integer matrix N that is its inverse (these are equivalent under Cramer's rule). Thus every equation $Mx = b$, where M and b both have integer components and M is unimodular, has an integer solution.

Relazione lineare tra vettori. In algebra, n vettori, v_1, \dots, v_n appartenenti a uno spazio vettoriale definito sul corpo F sono linearmente dipendenti se intercorre tra di essi una relazione del tipo: $\alpha_1 v_1 + \dots + \alpha_n v_n = 0$ dove $\alpha_1, \dots, \alpha_n$ non sono tutti nulli. Se invece l'eguaglianza è soddisfatta solo per $\alpha_1 = \dots = \alpha_n = 0$ i vettori sono linearmente indipendenti. Se un vettore può essere scritto nel modo seguente:
